Insights Analyst- Data Analytics
Staples
13800 E. 39TH AVE.
Aurora, Co 80011

Dear Staples:

Justin Holman suggested that I contact you regarding the open Insight Analyst and Data Analytics position with Staples. I have recently graduated from Colorado State University of Pueblo. My educational background is in the field of Business Administration. In the process of receiving this degree, I developed Statistical analysis skills. Advocating these traits strongly makes me an excellent candidate for this position.

Through the Statistical courses I've taken at CSU-P I began to realize where my expertise were in. I have worked numerous of regression models, structured and unstructured data which all can help to identify problems in the company. Also I have become quite experienced with translating numbers into words. I am capable of looking at data and making predictions to see if the data represented shows any accuracy or flaws. Like any other company, data accuracy is vital and I can ensure I will be able to point out any defects. Not everyone understands what each statistical category or numbers mean, but it will be my job to develop charts, graphs and data reports to provide a clear representation of what the reports show. It is my commitment to make the company compete at the highest level.

If you have questions, or if you want to schedule an interview, please contact me at 520-891-1523. I look forward to meeting you to further discuss employment opportunities with Staples.

Sincerely,

Mario Sanchez
Enclosure
